

BRAD BELNAP

St. Paul, Minnesota • (801) 558 8871 • belnapbrad@gmail.com

Professional Summary

Senior enterprise technology leader bringing hands-on experience deploying LLM systems, shaping AI observability and governance frameworks for enterprise agentic products, and building data pipelines and automation tooling that make AI platforms measurable and secure. Brings deep Microsoft 365 ecosystem expertise developed through ownership of enterprise M365 governance products. Combines sharp technical knowledge with excellent communication and business acumen.

Technical Skills and Competencies

AI Tooling & LLM Platforms: Claude, ChatGPT, Copilot, Azure AI ecosystem, Ollama, Llama.cpp, Open WebUI, LangFuse, Hugging Face

Microsoft 365: Microsoft 365 governance and security, Entra ID, SharePoint, Azure Cloud

Scripting & Data Languages: PowerShell, Bash, Python, YAML

Infrastructure: Docker, Docker Compose, Proxmox hypervisor, Unix, hardware systems

Governance & Data: LLM performance monitoring strategy, agentic product capabilities, AI governance frameworks, data pipeline design, product analytics instrumentation

Professional Experience

CoreView | *Enterprise Microsoft 365 governance, security, and automation platform*

Senior Product Manager | July 2025 – June 2026

- Defined AI performance monitoring strategy for CoreView's enterprise agentic AI assistant built on Azure OpenAI
- Advised engineering on LangFuse instrumentation implementation, identifying high-signal telemetry for performance evaluation and ongoing product improvement
- Implemented product analytics platforms and built data infrastructure and dashboards across the organization; trained cross-functional teams on data collection methodology and utilization
- Collaborated with AI product team to scope enterprise agentic capabilities; conducted structured discovery with M365 tenant administrators, gathering and synthesizing insight on high-value AI use cases, workflow pain points, and implementation priorities that shaped the agentic feature roadmap
- Established KPIs and built a product metrics framework that included AI product usage tracking, building the measurement infrastructure to surface efficiency gains, usage patterns, and ROI
- Managed global Customer Advisory Board of Microsoft 365 enterprise customers; synthesized complex technical feedback into product priorities and strategic roadmap decisions

Product Manager, Simeon Cloud (acquired by CoreView) | February 2023 – June 2025

- Designed and executed platform modernization from legacy self-hosted architecture to full SaaS delivery; scaled customer base from 440 to 1,070 organizations in 12 months
- Contributed directly to growing ARR from under \$1M to over \$3M in under 12 months by owning customer-facing product strategy and driving execution that solved high-priority customer problems
- Built robust domain expertise in Microsoft 365 governance, security automation, and compliance while owning product strategy for an enterprise M365 management platform
- Regularly hosted internal town halls, trained diverse teams on technical concepts, and evangelized strategy to executive leadership ensuring alignment across the product lifecycle

Utah Department of Health and Human Services | *Statewide agency ensuring all Utahns thrive in equitable, healthy, and safe communities at all stages of life.*

Program Manager II | July 2013 – February 2023

- Built Utah's first statewide food security program from scratch, connecting food-insecure households to local food resources; secured and managed over \$4M in state and federal funding through multi-sector stakeholder partnerships
- Directed the Utah Comprehensive Cancer Control Program and Cancer Genomics programs; managed cross-functional teams and oversaw a >\$3 million budget
- Appointed by UDHHS deputy director to represent the agency on the Utah Food Security Council, a legislatively mandated body chaired by elected state legislators; served as agency delegate on the Huntsman Cancer Institute Advisory Board for over two years
- Designed and delivered a novel statewide public policy database platform, utilizing jQuery, MongoDB, ArcGIS, and Bootstrap frameworks; gives policymakers and internal leadership centralized access to critical health regulations and enabling faster, evidence-based decision-making
- Designed, built, hosted, and shipped feature-rich web platform for statewide coalition management entirely in-house, delivering \$40K+ in cost savings while accelerating stakeholder connectivity and coalition activation
- Operated a statewide network of strategic partners to accelerate program operations, including healthcare providers, insurers, businesses, and community organizations
- Developed competitive RFPs and engaged in vendor selection, price negotiations, budget development and management, and vendor evaluation
- Established OKRs, SMART objectives, and success metrics to maintain alignment with federal requirements and drive data-informed decision-making at the program and policy level
- Directly engaged community members, elected officials, and executive stakeholders in voice of consumer research

Technical Projects

Local LLM Infrastructure *Ollama* | *Open WebUI* | *Proxmox* | *Docker Compose*

- Deployed and operates a local LLM environment using Ollama for model serving and Open WebUI as the interface layer, running locally on custom hardware with containerization and Docker Compose orchestration
- Practical experience with LLM model management, local inference configuration, and prompt engineering across multiple open-source models

AI Resume Assistant *React* | *Tailwind CSS* | *Python* | *Anthropic API* | *Docker*

- Designed and built a full-stack interactive resume app end-to-end. Includes a React frontend and FastAPI backend, AI agent integration for intelligent interactions, deployed on a self-hosted VPS through Pangolin reverse proxy with Let's Encrypt TLS.

Homelab Server infrastructure | *Virtualization* | *Debian Linux* | *Docker* | *LXC*

- Built and maintains server-grade hardware at home. Used for building and learning new technologies, hosting services, networking, AI, home automation, and for fun!

Education

Master of Public Policy, University of Utah, 2012

- Health systems emphasis, proficient in data analysis and policy implementation

Bachelor of Science Degree, University of Utah, 2009

- Environmental and Sustainability Studies Major, Nutrition Minor; 3.75 cumulative GPA
